Professional Profile

I am a mobile developer with experience in building scalable, maintainable native applications that deliver an excellent user experience.

I enjoy applying modern architectures and following best practices, as I believe good code should be clean, organized, and testable.

My main strength lies in Front-End development, although I can also work comfortably on the Back-End when needed.

I am known for my adaptability, problem-solving mindset, strong attention to detail, and an open attitude that facilitates teamwork.

Work Experience

Nolana | Mobile Developer (Freelance) (Sep 2025 — Jun 2026) [App Store](#)

- Spearheaded the end-to-end development of the application, from market research and conceptualization to its successful publication on the App Store.
- Defined the software architecture and programmed the entire solution, managing both the native front-end and back-end development.
- Designed a product-centric User Interface and User Experience (UI/UX) focusing on usability and performance.
- Implemented comprehensive testing to ensure application stability and autonomously managed the complete deployment process.

Atila Legal S.L. | Client Advisor & Manager (Currently)

- Managed the full client relationship cycle, acting as both setter and closer, from initial prospecting to finalizing services via video conference.
- Conducted analytical studies on the technical and financial feasibility of bankruptcy proceedings.

Turyelectro S.L. | Technical Operator(Sep 2018 — Aug 2024)

- Inspected and refurbished network equipment.
- Maintained computer systems, including diagnosing and repairing faults in electronic and network devices.

Education

Full Stack Mobile Developer | KeepCoding, Madrid (Sep 2024 — Sep 2025)

- **Native & Reactive Development:** Built scalable iOS/Android apps from scratch using Clean Architecture, MVVM, VIPER, Combine, Coroutines, and async/await
- **Backend & Testing:** Implemented API consumption, automated testing, and server-side development utilizing Vapor and SQLite.

OpenBootcamp, Software Development Bootcamp (Jan 2022 — Feb 2023) | OpenBootcamp First formal entry into software development, building the core foundations for my mobile specialization.

- **Concepts:** Programming logic, OOP, and development environments.
- **Stack:** Python, HTML, CSS, SQL, Git/GitHub.
